

## Deren Lei

6681 Berkshire Terrace Apartment 11 - Goleta, CA 93117

501-291-9906

[derenlei@engineering.ucsb.edu](mailto:derenlei@engineering.ucsb.edu)

---

### Education

University of California, Santa Barbara

Bachelor of Science, Expected 2019

Major: Computer Science B.S.

Planning to Declare: Computer Science & Statistical Science Double Degree

Program: College of Engineering Honors Program & College of Letter and Science Honors Program

GPA: 3.91 (Around Top 2.5%)

---

### Relevant Experience

#### Data Mining and Bioinformatics Lab (*Undergraduate Researcher*)

Fall 2016 – Present

- Assistant researcher in **Human Connectome Project**, WU-Minn-Oxford consortium.
- Working with two PhD. students with the guidance of Professor Ambuj Singh.
- Helping core researchers to process data using pipeline and setting up brain imaging tool box using CNSI server, and using **FSL** library to analysis FMRI.
- Python in Linux platform. Earned 2 letter-grade credits in winter 2017 as undergraduate research course.

#### GaucheMap Project (*Group Leader*)

Spring 2017

- Developed a map based event sharing system on **android** platform using **Google Maps APIs**.
- Cooperate with two seniors and one sophomore in UCSB.
- Java and xml in windows platform.
- Github link for the project code: <https://github.com/derenlei/GaucheMap>

#### UCSB Data Science Club (*Member*)

Fall 2016 – Present

- Project group **leader**, managed a group of 3 students. Doing projects on **Kaggle competition**.
- Last project: using **numpy**, **panda**, **matplotlib**, **k fold cross validation**, **random forest model** of machine learning to predict which passengers on Titanic survived. Ranked **top 9%** among 5000 teams.
- Python in windows platform. Currently learning Matlab and neural networks. Current project: classify hand written digits using the MNIST data using neural networks.

#### Reversi Project (*Group Leader*)

Summer 2016

- Building the Reversi chess game by using C++. Seeking ways to build artificial intelligence to play against human.
- Self learnt knowledge about **static evaluation function** and **negamax function** and **alpha-beta pruning**.
- Learning how to build **graphical user interface** through Qt.
- C++ in windows platform.

#### Search Engine Optimization Group (*Founder*)

Fall 2013 – Fall 2015(High school)

- Established, operated a website. Managed a group of 6 students and delegated tasks as well as meetings.
- Made the website ranked **top 5** by searching through different targeted key words on Google by doing both **internal** and **external optimization** including **link exchange**.
- Won the **first prize** in my high school student research project competition.

**Technical Tools:** Fluent in C/C++, Java, Python, familiar with R, XML, SQL, SQLite, MIPS Assembly

---

### Extracurricular Activities

#### Micro-Charity Simulation Company (*Founder, CEO*)

Fall 2013 – Fall 2015(High school)

- Negotiate with Xixian Education Foundation and get \$200 initial fund.
- Founded the simulation company and managed 10 students.
- Selling school souvenir watches. Maximum daily sales: **\$2000**. Donate 80% of the money to students in straitened circumstances and contact them through letter.
- Won the **first prize** in Beijing student research project competition.
- Invited to Shenzhen to **give presentation** to 100 **distinguished** entrepreneurs.
